

## Bulk Solids Storage

### NONHAZARDOUS SOLIDS

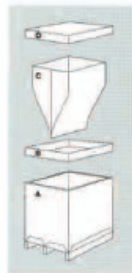

The SpaceKraft® IBC for solids is a six-ply thick corrugated tote that can be reused as many as 30 times and still be in great shape.

- **Reusability.** Unlike laminated bulk boxes and other containers commonly used, SpaceKraft® can be reused, considerably reducing packaging costs and resulting in source reduction.
- **Superior strength and durability** through six-wall seamless construction and more than 17 tons of compression strength.
- **Standard or custom.** SpaceKraft® for solids is available in a wide variety of capacities and configurations. In addition, depending upon volume, we can customize container sizes to meet your specifications.

#### SKT41: EXCELLENT FOR ANY INDUSTRY USING CLOSED LOOP SYSTEMS

As illustrated by the frozen foods industry above, SpaceKraft® SKT41 is ideal for closed loop systems continuously reusing routing containers. Automotive parts, small hardware and other assembly items can be easily transported from point to point. **SKT 41 has one-piece construction and an automatic bottom for fast and easy setup and knockdown.**

*With no wood or metal parts, SpaceKraft® for solids offers easy setup by one person in about one minute. The sleeve (A) is squared off on a pallet, and the tray (B) is placed in the bottom. The film liner (C) is then inserted, and the box is ready to fill. After filling, the cap (D) is put in place.*

*SpaceKraft® for solids can be stacked up to six high for optimum use of storage space.*

#### HAZARDOUS SOLIDS

**The only corrugated IBC for solids approved for UN Packaging Group I hazardous materials!**

Ideal for pelletized, granular or powdered products classified as hazardous materials. SpaceKraft® for Packaging Group I, II and III hazardous solids is available in

the following sizes:  
(inside dimensions)

- 39 1/2" x 39 1/2" x 40"
- 35" x 43" x 40 1/2"
- 42" x 42" x 41"
